

GateLink Validation ADMISSION SYSTEM

INTELLIGENT
ENTRY
SOLUTIONS

alvaradomfg.com

Alvarado's GateLink Validation is a proven admission control solution that seamlessly combines Alvarado's intelligent admission control products, and any ticketing system, into a state-of-the-art facility admission system. GateLink is used in hundreds of facilities and has validated nearly one billion tickets. Our installations include high profile stadiums, arenas, and venues worldwide.

As patrons enter the facility, GateLink provides real-time, online validation of tickets, season passes, and credentials, even print-at-home and cell phone tickets. The system provides immediate validation information and stores the time and location of each scan. Information is immediately available to supervisors using portable terminals, or later, via our extensive reports.

The entire GateLink system is comprised of three components:

GateLink Validation Software is a server based application that communicates with the entry equipment and the facility ticketing system.

Alvarado Intelligent Admission Equipment consists of turnstiles, pedestals, and handheld scanners that seamlessly operate with the GateLink Validation software. Alvarado products are well-engineered, robust, and attractive.

Integration to the Ticketing Provider is accomplished through our proven API that has been implemented at hundreds of facilities throughout the world.

GateLink Validation Features

- Provides instant validation of all types of tickets
- Operates with Alvarado's proven entry equipment
- Interfaces with any modern ticketing system
- Allows multiple user-defined access levels
- Supports "print at home," "cell phone tickets," and paperless entry using magnetic stripe cards or other media
- Provides advanced reports & analysis
- Clients have direct access to SQL database

Protecting assets and controlling the flow of people

Best Choice for Admission Control

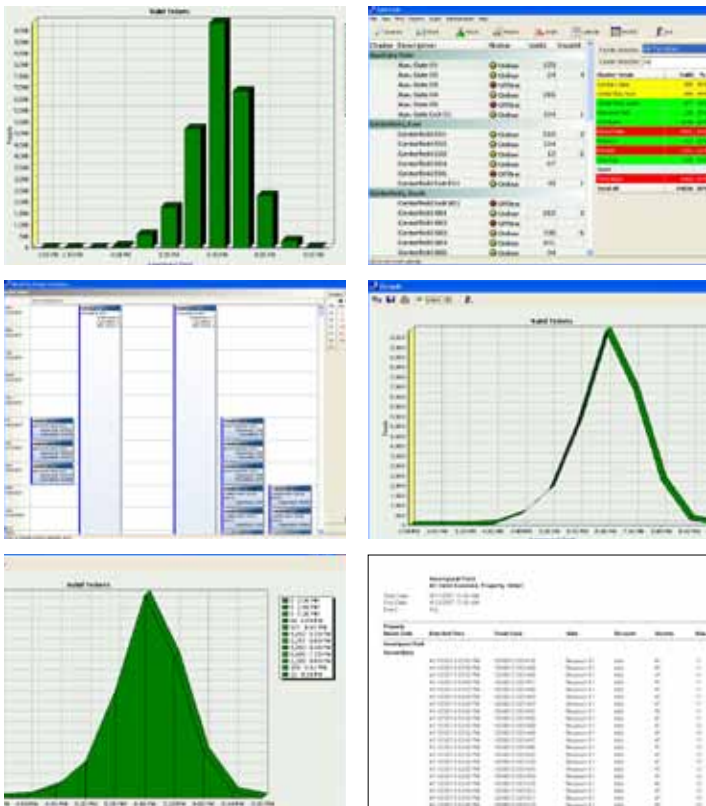

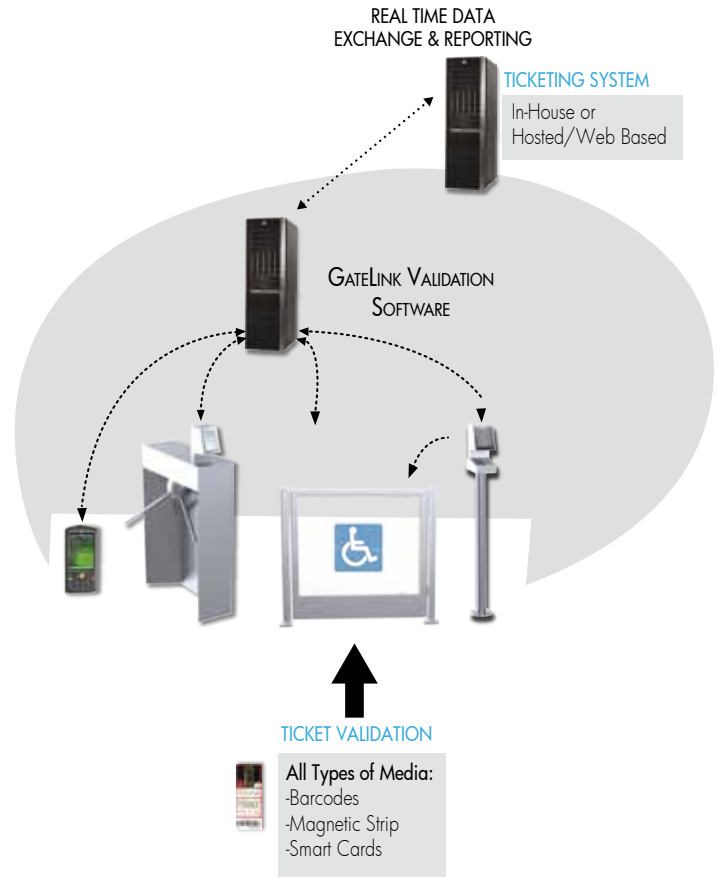

Alvarado offers best-in-class admission control hardware, software, and integrated solutions

GateLink Validation allows real-time, online validation of tickets, season passes, and credentials, even "print at home" and cell phone tickets.

Moreover, unlike proprietary systems, GateLink is completely compatible with all ticketing companies. Whether a facility uses an in-house ticketing system, or a third-party company, (or both), GateLink is the obvious choice to close the loop between the ticket purchase and the gate.

Information & Reporting

GateLink Admission has event and entry information available for immediate viewing. The system can also generate dozens of real time reports and has the capability to send real-time entry reports to networked devices such as mobile phones. In addition, clients have direct access to the system SQL database for customized report creation.

Intelligent Admission Equipment

Alvarado is a leading entry equipment manufacturer. We offer best of breed entry equipment that serves as the hardware backbone of the GateLink Validation system. Our intelligent entry equipment communicates to the GateLink server through wired or wireless Ethernet and effectively operate in off-line mode if necessary.

- TAS-SC (ticket reading turnstile)
- TAS-SCP (ticket reading/ticket printing turnstile)
- TAS-P (ticket reading pedestal)
- PocketGate HH (handheld scanner)
- PocketGate HHP (handheld scanner w/printing)
