

Alvarado's CPI steel corner guards provide high-impact protection for valuable retail fixtures.

CPI corner guards are suitable for use in most applications that require the high pullout rating of a fixed-anchored steel case protector.

The square angled design of the CPI allows the case guard to be installed in front of corners of refrigerated cases and other fixtures, and is often used as an alternative to traditional case protection posts.

Alvarado's CPI corner guards are constructed from heavy gauge steel, and are easily installed using inside mounting tabs for secure, fixed anchoring in concrete. Anchor package is included.

The CPI comes in heights of 12", 16" and 24" to suit various case protection applications.

Model CPI steel corner guards are available in a low maintenance, bright finish chrome.

- **Square Angled Design**
- **Heavy Gauge Steel Construction**
- **Fixed, Four Bolt Anchoring**
- **12", 16" or 24" High**
- **Bright Chrome Finish**

ALVARADO
