

Alvarado's modular posts and railing can be used to create virtually any railing configuration. Alvarado offers a number of standard posts with outlets and a large number of standard railing lengths; all available for immediate shipment.

The use of our modular railing components is limited only by your imagination. Typical uses include queuing, dividing areas, channeling customers, limiting access to areas, providing a backing for pallet or merchandise storage, or as an indoor cart corral.

Combining posts and railing with Alvarado turnstiles and gates is a very inexpensive and highly effective method of channeling

customers and reducing shrinkage in retail applications.

Alvarado's 35" posts and rail are available in bright chrome, #4 (satin finish), or a #8 (mirror finish) stainless steel. Color powdercoat is also available by custom order; 44" and 48" posts are available in bright chrome.

Posts are 2.25" outside diameter. Railing is 1.75" outside diameter.

Anchors are ordered separately. Alvarado recommends "Vogue style" anchoring for most applications.

DOUBLE RAIL POST CONFIGURATION

AVAILABLE IN BRIGHT CHROME AND MIRROR AND SATIN STAINLESS STEEL FINISHES.

WALL FLANGE (WF)

POST BUMPER GUARD (PBG)

The wall flange allows railing to attach directly to walls, eliminating the need for a post.

The solid neoprene PBG wheel attaches to any 2.25" post to safeguard posts and equipment from impact damage. The PBG wheel has a 5.5" outside diameter.

TRIPLE RAIL POST CONFIGURATION

TRIPLE RAIL PROVIDES GREATER SECURITY. AVAILABLE IN BRIGHT CHROME.

DOUBLE RAIL CONFIGURED AS A CART CORRAL. CB BUMPER AT THE END OF THE CORRAL PROVIDES A STOP FOR CARTS.
