SECURITY TURNSTILES

alvaradomfg.com

Alvarado's SLT turnstiles offer reliable patron control and accurate counting at a cost-effective price.

The SLT is a waist high, three arm turnstile that offers a wide patron passage width in a streamlined, compact design. Internal components are stainless steel and precision cast to provide years of trouble-free operation.

The SLT's hydraulically dampened arm rotation and automatic arm self-centering provides patrons a smooth turnstile passage.

For added versatility, the SLT may be ordered as a portable unit. The portable option includes a base plate, wheels and stainless steel guide rail.

Alvarado's SLT models are available in stainless steel and a black wrinkle powder coat finish.

- **Comfortable Patron Passage Width**
- **Stainless Steel Internal Components**
- **Single or Bi-Directional Configuration**
- **Accurate Patron Counting**
- **Portable Units Available**

ALVARADO
