## WATCHMAN COLLISION AVOIDANCE ALARM

Alvarado's newly redesigned Watchman helps prevent costly repairs and injuries caused by forklifts in warehouses, factories, stores and other facilities.

When installed in front of (and slightly below) roll up doors and overhead objects, contact with the Watchman triggers a loud siren and flashing red lights, warning forklift drivers and warehouse management before a collision occurs.

In addition to overhead doors, the Watchman can be used to protect conveyor systems, canopies, walls, pipes, sprinklers, ducts and other overhead fixtures.

The patented Watchman can be purchased for a fraction of the average repair bill for a damaged overhead door, making it practical to equip your entire facility with this unique safety device.

Available in battery or AC powered versions.

A FLASHING LIGHTS WITH PROTECTIVE GUARDS

B CEILING MOUNT CABLE CONNECTIONS

C IMPACT RESISTANT SAFETY YELLOW ABS TUBING

D LOUD ADJUSTABLE DURATION ALARM

E LOW BATTERY INDICATOR LIGHT

### BATTERY POWERED UNITS

Part No.	Product Description
----------	---------------------

WM-0808B	8' Length
----------	-----------

WM-0810B	10' Length
----------	------------

WM-0812B	12' Length
----------	------------

\*BATTERY LIFE EXCEEDS 1 YEAR WITH NORMAL USE.

### AC POWERED UNITS

Part No.	Product Description
----------	---------------------

WM-0808	8' Length
---------	-----------

WM-0810	10' Length
---------	------------

WM-0812	12' Length
---------	------------

\*AC POWERED UNITS INCLUDE A 115VAC POWER SUPPLY THAT STEPS DOWN POWER TO LOW VOLTAGE.
