Product Description: The Watchman guards against overhead collisions in warehouse facilities. When it is installed in front of roll up doors and overhead objects, the Watchman will trigger a 120db siren and flashing red lights if anything comes into contact with it. This warns the driver to immediately stop. It also alerts management so that proper supervisory action can be taken. Unit is powered by sixteen standard 'D' cell batteries (not included) that last up to one year with normal use; a light on the bottom of the unit indicates when the batteries are low.

Components:

- The **Tube Body** is bright yellow, impact resistant, 4.2" diameter PVC tube.
- The **End Cap** is injection-molded nylon.
- The **Microprocessor, Circuit Board, Warning Lights, and 120db Alarm** are all industrial grade.

Size: Lengths available are 6', 8', 10' and 12'.

Shipping: The Watchman is shipped fully assembled. Alvarado ships products throughout the world.

Installation: Installation should be performed by a skilled installer following the manufacturer's directions and instructions (supplied with the product).

Option: AC Power – Plugs into a standard outlet. The unique design resists “spikes” when on the same circuit as disrupting devices such as electric overhead doors.

Warranty: Alvarado Manufacturing Co., Inc. warrants the Watchman from defects in material or workmanship, for the period of ONE YEAR from date of shipment. Complete details of the warranty are available from Alvarado by request.

Technical Services: Technical information is available from Alvarado Mfg. Co., Inc., and its representatives, distributors and dealers.
