

Argus V60

Compact Swinging Barrier Optical Turnstile

With a cabinet depth of only 9.5" (240mm) and the industry's best sensor technology, the Argus V60 offers the smallest footprint with the strongest tailgating detection of any optical turnstile on the market today. This combination makes the Argus V60 perfectly suited for high traffic areas with constrained space requirements.

Product Features

- Compact design
- Superior tailgate detection
- Automates employee and guest entry
- Fast user throughput up to 60 PPM
- ADA passage widths
- Integrates with all credential readers
- Integrates to access control/life safety systems
- Many customization options

Standard Lane Widths

Standard	26" wide passageway
ADA	36" wide passageway

Common Applications

- Employee entrances
- Elevator lobbies
- Visitor check-in areas
- Public-to-secure transition areas
- Department entrances

Typical Installation Sites

- Government facilities
- Corporate lobbies
- Healthcare Facilities
- Data Centers
- Student Housing
- Recreation centers / Health Clubs

Options

- Five barrier heights (39", 47.25", 55.12", 63", 70.87")
- Available finishes include True White, Deep Black, Corporate Satin, Organic Sand, Digital Silver, and Vector Edge (see page 3).
- Custom finish options can be applied separately to the profile, inlay, side panel, and drive unit
- Custom barrier etching (on Polycarbonate barrier only)
- Illuminated RFID icon and running lights guide and instruct patron
- Static barrier panel lighting
- Preparation for front-facing integrated barcode reader
- Floor Saver Platforms

Safe and User Friendly Operation

- Individual customizable sounds (.wav files) provide notification of card status and alarm conditions (i.e. an unauthorized passage attempt)
- Closed loop motor control and strategically placed safety sensors provide a high level of user safety

Electrical

Power Supply	100-240 VAC, 50/60 Hz, 300 VA
Standby Power	17 VA

IP Enabled Technology

The Argus V60 allows browser-based configuration and control from a PC, tablet or smart phone. Alvarado's GateKeeper monitoring software provides a virtual desktop view of installed turnstiles, and allows attendants to perform operational functions such as processing one-time passages changing operational modes, event scheduling, data collection, and reporting (showing turnstile activities, such as alarm conditions and passage activities.)

Access Control and Fire System Integration

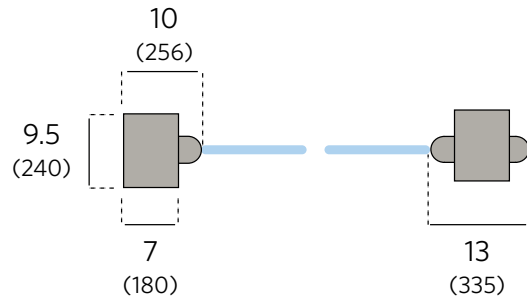

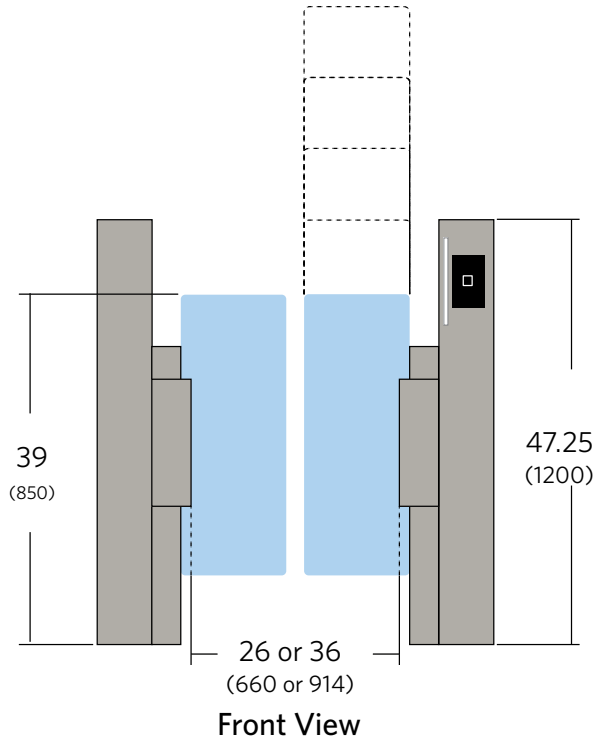

The Argus V60 integrates easily to access control and fire system. During an emergency the barriers unlock.

Operating Modes

Card in/card out; card in/free exit; free entry/free exit; exit only; blocked (closed/locked barriers); free flow (barriers are not engaged).

Dimensions

Dimensions shown in inches (mm).
