

BASE ADAPTERS

For Retractable Belt Stanchions

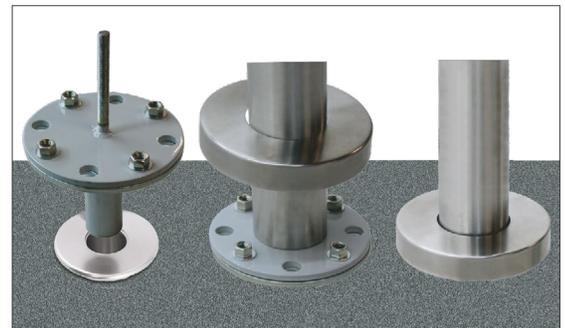

Alvarado has added two new base options to the Quick Queue line of retractable belt stanchions. Already installed in select retail locations, these new options add an extra level of versatility.

Alvarado's fixed base adapter makes Quick Queue Stanchions perfect for applications areas that have consistent traffic and require regular pedestrian control. The wide base flange secures to the floor with concrete anchors to provide a stable, fixed post. Retractable belts may still be quickly extended or retracted to open or close lanes of traffic.

The Removable Base adapter makes Quick Queue stanchions ideal for areas that need pedestrian traffic control one day, but a clear pathway the next. Removable Quick Queue stanchions fit perfectly into Alvarado's core drilled sockets. Sockets include a drop-in, flush fitting cap for insertion when not in use.
