

GATELINK 10

Gate Admission Software

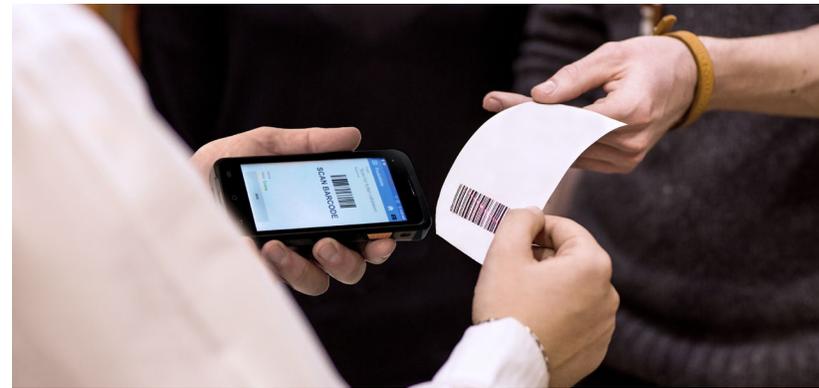

GateLink 10 is gate admission software designed for use at both reserved seat and general admission venues. Used in hundreds of facilities, GateLink has validated nearly one billion credentials in stadiums, arenas and venues worldwide.

GateLink 10 integrates with Alvarado’s intelligent admission devices, and any modern ticketing system. The software supports all technology-driven digital ticketing trends, including web-based season ticket holder transfers, paperless ticketing, group entries, and entitlement and loyalty recognition award notification. GateLink 10 also supports the validation of paper, print-at-home and cell phone barcodes, as well as RFID, magnetic stripe and biometric media.

Key Points

Powerful	Single server controls over 200 validation devices via TCP/IP. Nearly instantaneous validation of presented credentials.
Flexible	Suitable for all types of entertainment venues. Supports dozens of functions including multiple and secondary entry, patron and attendant validation, ticket/receipt printing at entry points, group entries and attendant log on and tracking.
Reporting/SQL Database	Dashboard, graphs and interactive drill-down reports provide instant access to real-time event and entry information; open SQL database allows export of data for custom queries, reports and analytics.
Media Validation	Validates 1D/2D bar codes, cell phone barcodes, passbook, RFID and magnetic stripe.
Entry Hardware	Seamlessly integrates to Alvarado intelligent admission hardware.
Third Party Systems	Easy interface to ticketing and other third party systems.
Offline Validation	Continued operation in the event of network failure.

Two versions of GateLink 10 are available:

GateLink 10 is a single venue entry control solution. Typically implemented on-site at the venue, with a dedicated server that communicates with 200+ access devices.

GateLink 10 Multi-Venue is designed for use by ticketing companies or organizations to host multiple smaller venues remotely on a single server. Automatic synchronization across different time zones. Access device limitations per venue apply.

Common Applications

- Front Gate Entry Control/ Reserved Seat and General Admission Facilities
- Secondary Location Entry Control (i.e., private suites)
- Parking Lot Entry Control

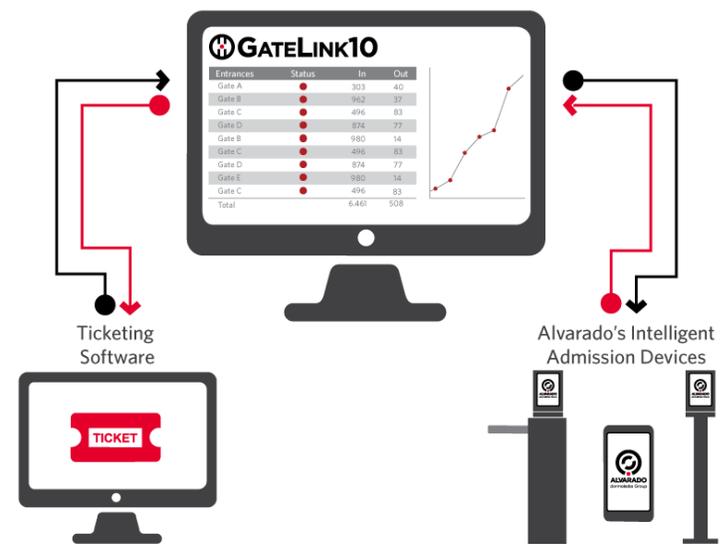

Complementary Products

GateLink 10 operates with Alvarado's intelligent admission turnstiles, entry stations and mobile terminals.

Gate Link 10 & VenueView360™

GateLink 10 integrates with VenueView360, Alvarado's membership/loyalty application suite. GateLink 10 connects entry validation to patron accounts allowing the triggering of automatic rewards and incentives.

Typical Configuration
