

**FOR IMMEDIATE RELEASE**

## **New UltraQ-ACT Turnstile Is Latest Technology for Venues**

**INDIANAPOLIS, November 16, 2021** – Alvarado’s new UltraQ-ACT Turnstile is a compact intelligent admission device for touchless entry. When guests present a valid mobile or printed entry credential, the motorized panels open away from the guest, providing a clear path for entry. As guests self-validate credentials, attendants can focus on customer service and crowd control. A single staff member can monitor multiple devices.

“The UltraQ-ACT turnstile provides a high-end admission experience,” said Brian McNeill, Vice President of Sales – Sports & Entertainment for Alvarado. “It has a very small footprint compared to other swing door admission turnstiles. Theme parks, waterparks, and zoos receive the security benefits of a swing barrier admission gate paired with a positive guest experience in a solution that saves space. It is the latest technology for venues.”

Specific features include:

- **Validates all types of credentials** including mobile phone bar codes, RFID, Apple and Google NFC digital wallet smart tickets; and has the option to add other readers such as biometric
- Highly responsive, supporting **up to 30 validations per minute**
- **Detects tailgating** to reduce invalid entry
- **Bright 7” color display** and customizable graphics for team or venue branding, advertising, and messages or instructions to guests
- **ADA passage widths** are optional and allow for wheelchair, walker, and stroller access
- **Bi-directional entry/exit** allow the same turnstile to support either entry or exit validation
- **Highly visible LEDs provide attendant notification of presented credential status (valid or invalid)**; during non-scanning time LEDs provide color transitions and illumination in any RGB color
- **Fixed or portable** with battery power and Wi-Fi
- **Server communication** is wireless or optional wired LAN communication (Dual-band 802.11ac 2x2 MU-MIMO)
- **Fast, reliable validation** and smooth motorized arm rotation **enhances guest experience**
- **Superior barcode scanning** in all conditions

The UltraQ-ACT is suitable for indoor and outdoor use, battery powered, and uses Wi-Fi communication. In addition, it easily integrates to facility fire systems. Panels will open in the exit direction and remain open to provide clear passageway for exiting guests.

## **Ticketing System Integration**

The UltraQ-ACT works seamlessly with GateLink10, Alvarado's widely used admission control software. GateLink10 also provides direct plug and play connections to widely used ticketing/access systems such as Ticketmaster Presence. Alvarado also offers DirectConnect API, which can communicate directly with third-party systems.

NOTE: This product is available to order now with delivery in early 2022.
