Protection Posts

Alvarado's posts prevent damage to expensive store fixtures and equipment and come in four different models.

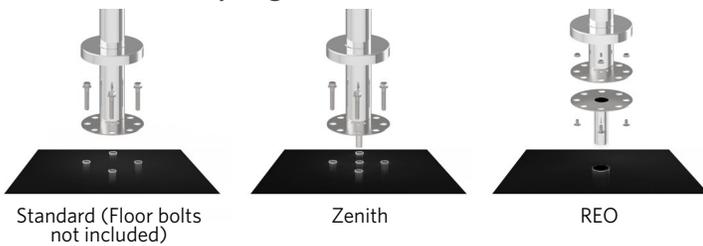

Vogue Posts

Product Options

- 35", 44" and 48" heights available
- Core drilled 35" posts available
- 35" posts available in chrome, stainless steel (satin and mirror finish) and custom powder coat
- 44" and 48" posts available in chrome, mirror stainless steel and custom powder coat

Anchoring Options

- Standard: uses four expanding floor anchor bolts
- Zenith: Standard anchoring plus the added support of an all thread rod that extends down the interior of the post into a center expansion anchor.
- REO: Makes any Vogue removable

Space Saver Post

Space Saver posts have a smaller diameter base for applications where floor space is limited.

Product Options

- Available in 35" height only
- Available in chrome, mirror stainless steel and custom powder coat
- Matching base cover included

Anchoring Options

- Single 1" diameter anchor rod that extends down the interior of the post

C Post

The C post is a 36" fixed anchored post with a chrome finish that provides heavy-duty protection in environments where forklifts, pallet jacks, and hand trucks are used.

Anchoring Options

- Standard: uses four expanding floor anchor bolts
- (Floor bolts not included)
- REO: Makes the C Post removable

LS Post

The LS post is a 35" removable post with stainless steel finish for use in areas where post removal is periodically required. The post fits into an included socket and when removed, an included socket cap covers the hole opening.

Dimensions

Measurements in inches (mm)

- Vogue: 2.5 (70) tube diameter | 5.5 (140) base diameter
- Space Saver: 2.5 (70) tube diameter | 3.5 (89) base diameter
- C Post: 3 (76) tube diameter | 5.5 (140) base diameter
- L Post: 2 (51) tube diameter | 5.5 (140) base diameter

Complementary Products

The DM and CRI corner guards are a highly effective method of preventing damage to expensive store fixtures and equipment, reducing your maintenance and repair budget. The fixed models are durable and made from heavy gauge steel, yet attractive and easy to install with included mounting hardware.
