SU2000

Optical Turnstile

Simple and elegant, the SU2000 is the thinnest Alvarado optical turnstile. The absence of a physical barrier and superior optical technology ensures fast throughput while detecting and alarming unauthorized passages. Its compact design makes it ideal where floor space is limited.

Product Features

- Superior tailgate detection
- Automates employee and guest entry
- Fast user throughput
- ADA passage widths
- Integrates to access control systems
- Control from PC, tablet or smartphone

CE LA TESTING

IP Enabled Technology

The SU2000 is an IP enabled device allowing web-based configuration and control from a PC, tablet or smartphone. Alvarado's GateKeeper monitoring software provides a virtual desktop view of installed turnstiles, and allows attendants to perform operational functions such as processing one-time passages and changing operational modes.

Access Control and Fire System Integration

The SU2000 integrates easily to access control and fire systems through I/O (dry contact).

Operating Modes

Card in/card out; card in/free exit; free entry/free exit; exit only.
