Suite Access Terminal

Suite boxes and club seating have become a prevalent feature of major sports and entertainment venues. Alvarado's IntraQ suite access terminal is perfect for controlling access into suites and other exclusive areas.

The IntraQ suite access terminal is a compact device that validates printed and digital bar coded credentials and unlocks suite doors. The IntraQ suite access terminal has a bright TFT color screen that provides guidance to patrons as they self-scan credentials to access suites or other restricted areas.

The intraQ attaches directly to a wall and is powered through the Ethernet connection (PoE).

Benefits:

- Allows guests to self-scan printed and mobile device displayed barcodes
- Fast and reliable validation in indoor and outdoor environments
- Power over Ethernet (PoE)
- Available in multiple finish colors

Features:

Media Validation . . . . . Validates all types of 1D/2D printed and digital (mobile phone) barcodes

Bright TFT Display . . . . . Color displays provide customizable visual instructions for guests; a touchscreen interface allows operator to access administrator functions

Custom Graphics/Audio . . . . . Allows customized screen graphics and sound files to be associated with presented credential status

Server Communication . . . . . TCP/IP based via wired communication

Dimensions:
