IntraQ

Portable Entry Pedestal

The IntraQ pedestal is a portable entry pedestal that validates printed and digital bar code credentials at exterior and interior entry points. The pedestal has a bright TFT color screen that provides guidance to patrons as they self-scan entry credentials. LEDs on the back of the IntraQ notify attendants of presented credential status and identify when specialty tickets, such as child, senior or VIP, are scanned.

Because it is battery powered and communicates via WI-FI (802.11 a,b-n), the IntraQ pedestal is easy to move and position per event requirements.

- Validates Printed and Digital Bar Coded Tickets
- Battery Powered/Extended Battery Life
- Portable/Easy to Move
- Integrates With Most Ticketing Companies
- Dozens of Available Finish Colors
- Perfect for Performing Arts, Clubs and Exclusive Entrance Areas
